WHOISDRIVING.NET a simple, fast, convenient, reliable and secure way to find travel companions to built carpoools in your area.

A few mouse clicks and you get your search results, meaning detailed start- and destination points, best route, weather forecast, time of departure, shared travel costs, approximately driving time, energy consumption, reliability and user profile of your travel companions and printable maps of start and destination.

Based on this information you select your travel partners with a single mouse click. After this <<oneclick>> all information is exchanged by e-mail and SMS which leads to a quick automated appointment within seconds, without the else usual complications.

To set up the whole carpool arrangement takes less then a minute, why it is suitable for short-term and short distance trips.

WHOISDRIVING.NET can work everywhere including areas where fox and hare or lion and zebra bid each other goodnight.

For safety reasons you have to register before using this application. We will handle your personal data with great care and will not sell it or use it for any kind of advertisement.

If you like whoisdriving.net, help us to spread this new way of driving together by telling your friends (worldwide), neighbours and colleges, if possible use the intranet of your company to spread this link:
